TOWER I

Isa Stein Studio

Location: Leonding, Austria

Photography: Isa Stein

Area: 160 m²

The penthouse is located at the top of a medieval defense tower. Therefore all the interior is bent, which is situated along the curve. Especially the walk in closet in the first level is bent and worked on to deepen the understanding of the medieval walls. To make the curve ongoing, we placed a mirror at the end of the walk in closet.

When you enter the apartment, the room is dominated by a photo of the two children of our principals. The image is abstract to meet the idea of movement we had for the apartment. At the top level we situated the kitchen across from the cabinet, as a main attraction.
