Main materials: Glass, wood, steel, brick, etc.

布林德尔酒店水疗中心

WELLNESS SPACE SPA

The building is designed in a contour line and positioned on a sloping hill; it newly defines the piece of land on which it is built. The design attempts to absorb the pre-defined parameters of the environment and would appear to "reinforce" the natural surroundings.

A three-storey hall as a connecting link between the two structures which, however, simultaneously has the quality of serving as a multifunctional room and a tool which opens up into the restaurant, bar, therapy zone, rooms and spa.

88 rooms have been designed which take the points of the compass and noise zones into account. They offer perfect comfort. The view from the hotel is a particular asset and has been accomplished as a result of setting up the beds so that they face the windows. Five senses are five colours. The colours of the "Bründl logo" are mirrored in the colours of the rooms. The colour concept and the idea of a contour line continue in the swimming, wellness and sauna area as a separate element from the generous relaxation rooms. The loungers from Andreas Thaler are a particular eye-catcher since they have been made in the colours of the elements.

设计师在轮廓线上设计该建筑并把其建立在一个倾斜的山坡上，重新定义了它所在的这片土地。该设计尝试汲取环境预先定义的参数，从而似乎“巩固”了周边的自然环境。

一个三层高的大厅是两个结构的链接环节，但它同时具有这样的功能，即作为一个多功能厅和一个开辟成餐厅、酒吧、治疗区、客房和水疗中心的工具。

在设计88间客房时考虑到了界限和噪音区的问题，使其提供完美的舒适感。酒店外的风景是特殊的有利条件，通过设立床铺使它们得以实现面朝着窗户。五种感官是五种色彩。“布林德尔标志”的颜色映照在房间的颜色中。作为大气休闲室的一个单独元素，色彩概念和轮廓线的想法延续到了泳池、健身和桑拿区。来自安德烈亚斯·泰勒的躺椅特别地引人注目，因为它们加入了元素的颜色。
