CARPENTRY LIDAUER

Design Company: ISA STEIN Studio
Address: Austria
Area: 150 m²
Photographer: ISA STEIN

The carpentry Lidauer is already in the second generation and well known for its precise work in store construction and private residencies. Therefore the owners wanted the new showroom to be on one hand practical for showing samples and on the other hand visually appealing.

We designed cubes containing drawers, where all the samples are collected.

The height difference from the entrance to the showroom was quite a challenge. We put the conference table with a bench right at the boundary and created a subtle barrier.

The chosen colours are high gloss white and wood.
